

**GPS Marine Antenna**

**Electrical specifications**

|                         |                        |
|-------------------------|------------------------|
| Frequency Range(MHz)    | 1575.42Mhz             |
| Impedance(ohm)          | 50                     |
| Gain (dBi)              | 28dB                   |
| Polarization            | Vertical or Horizontal |
| Radiation               | Omni                   |
| VSWR                    | ≤1.5                   |
| Maximum input power (W) | 50                     |

**Mechanical specifications**

|                            |                   |
|----------------------------|-------------------|
| Connector                  | SMA/TNC/BNC       |
| Height                     | 107mm             |
| Diameter of Chassis        | 10mm              |
| Coaxial Cable              | RG58(white/black) |
| Length of Cable            | 3m/5m/10m etc     |
| Radome material            | ABS               |
| Color                      | Black             |
| Operating temperature (°C) | -40~85°C          |
